

IBEW Lifesaving Award

At the annual spring banquet, Local 577 was honored to present Scott Weyenberg with an IBEW Lifesaving Award. Scott is a VDV Technician currently working for Elmstar Electric Corporation. On July 19, 2007, Scott was working on a U. S. Bank site in Sheboygan and was able to finally take a break around two in the afternoon. Scott strolled out to a nearby pier on Lake Michigan. He noticed a young boy on the shore gazing out into the lake where his brother was struggling in the

water trying to get to shore. Scott sensed that something was terribly wrong and rushed to help. When he got to where the boys were, it was evident that the boy in the water needed help as the waves were pounding the young man against the rocks. Scott jumped in to assist and pulled the boy to safety. After he was rescued, the young man admitted that he was tired and unable to get himself out of the water.
