

It all began when...

Gustav (Gus) Fosick started Elmstar Electric Corporation in 1979 after leaving a now-de-funct electrical contractor. It was a challenging time locally and world wide during the 80's, but Gus through sheer determination and exuberant personality developed relationships with customers and contractors alike. With talented employees Elmstar has grown into one of the most respected & capable electrical contracting companies in Northeast Wisconsin.

Elmstar Electric provides solutions for commercial, industrial, institutional and municipal customers. Our services include:

- **Tele / Data Communications** - cabling & equipment, phone & voice mail systems, fiber optics, security systems, fire alarm systems, and CCTV
- **Electrical Contracting** - All facets of electrical construction including NFPA 70E Compliance, Design Build, and High & Medium voltage cable & equipment
- **Underground Services** - Parking lot and city street lighting, traffic signals and duct banks
- **Specialty Services** - Quick Response Repair & Service, Preventive Maintenance & 24 - Hour Emergency Service

Data Communication was added in response to the industry wide focus on technology. The expansion into data communications is part of the plan to position Elmstar Electric at the top of an extremely competitive industry by offering customers an all inclusive service. We now provide the full spectrum of electrical services that customers need...one call does it all.

Gus' has begun to turn the operation of the company over to his children. His daughter Carmen currently acts as the general manager and her brothers Ron and Clint are both electricians in the field. All three of the Fosick children have been involved with the business since childhood.

In recent years Elmstar has undergone restructuring. As part of this restructuring, Elmstar's focus from hard bid jobs, in which a contractor performs the work and moves on to the next job, to a service and maintenance model where they build relationships with the clients. Elmstar now focuses on bringing in business out of long-standing relationships... building a reputation of providing quality workmanship and superior customer service. It's not about turning in the lowest bid anymore it's about building a relationship and letting your client know you are a trusted partner.

Today our strengths at Elmstar Electric are our knowledgeable employees and experience. Our technicians and electricians are licensed and continually attend ongoing education programs to keep current with new trends and regulations. This wealth of experience allows Elmstar Electric the flexibility to handle projects of any size and scope.

Elmstar, family-owned and operated in Kaukauna for 28 years, is proud to be part of your community.

Thank You to our customers, our employees, and our community for helping us become a success.
